Een dossier voor elke student

Auteur	Jan Bartling (saMBO-ICT)
Datum	14 februari 2019

➡ Elke student heeft een eigen dossier

Flexibel onderwijs betekent dat een student eigen leerroutes kan volgen en niet uitgestudeerd is na het behalen van een diploma. Elke student heeft daarom een eigen digitaal dossier, altijd en overal toegankelijk. Met daarin harde gegevens over (zachte) vaardigheden, behaalde resultaten, werkervaring, certificaten, leermateriaal, stages, portfolio. Dit portfolio kan domein overstijgend zijn en gebonden blijven aan de persoon voor een leven lang ontwikkelen.

Dit vraagt om een nieuwe manier van kijken naar onderwijsdata, niet langer is de instelling de enige beheerder van de data, maar ook de student zelf.

Vanuit dit gezichtspunt is een heroriëntatie van de opslag en uitwisseling van gegevens noodzakelijk. Nieuwe technologieën, zoals blockchain bieden wellicht kansen. Maar ook initiatieven zoals in de zorg met MedMij zijn nieuwe concepten die de moeite waard zijn.

Startpunt is het goed in kaart brengen van de student-journey in al zijn variëteit. Ook het in kaart brengen van data en databronnen is een eerste stap. Vervolgens wordt beoordeeld welke technologieën en concepten bij kunnen dragen aan de doelstelling.

- ➡ Verzamelen (inspirerende) voorbeelden uit andere maatschappelijke sectoren en landen
- ➡ In kaart brengen van de student-journey en databronnen, vertaling naar wenkend perspectief

Met daarin harde gegevens over

- (zachte) vaardigheden,
- behaalde resultaten,
- werkervaring,
- certificaten,
- leermateriaal,
- stages,
- portfolio.

Dit portfolio kan domein overstijgend zijn en gebonden blijven aan de persoon voor een leven lang ontwikkelen.

The Journey of Life

Accreditation

When you apply to college, you can be sure the school will check your credentials. You need to do the same when you select a college. Make sure the institution you choose is properly accredited by a trustworthy organization. Be wary of for-profit colleges, particularly online or non-traditional programs that advertise heavily. The degree offered by these institutions may not be very valuable when seeking a job, despite the high tuition costs.

College Faculty

The professors and instructors at a university have the greatest impact on your education. Do you prefer to work with professors who are focused on research or on classroom instruction? Do you want a college with small class sizes that allow you greater access to professors, or are large lecture halls more your style? Spend time researching colleges' faculty online and in printed materials. You may even consider meeting with some of the professors or inquire about sitting in on a class.

Size

The professors and instructors at a university have the greatest impact on your education. Do you prefer to work with professors who are focused on research or on classroom instruction? Do you want a college with small class sizes that allow you greater access to professors, or are large lecture halls more your style? Spend time researching colleges' faculty online and in printed materials. You may even consider meeting with some of the professors or inquire about sitting in on a class.

Cost

The professors and instructors at a university have the greatest impact on your education. Do you prefer to work with professors who are focused on research or on classroom instruction? Do you want a college with small class sizes that allow you greater access to professors, or are large lecture halls more your style? Spend time researching colleges' faculty online and in printed materials. You may even consider meeting with some of the professors or inquire about sitting in on a class.

Safety and Security

A college campus is meant to provide a safe environment for young people to make the transition from living at home to living in the "real world." Unfortunately, crime is common in many colleges and universities. Sexual assault is a particular concern. When choosing a school, review crime reports to determine the security on campus and in adjacent areas. As a student, be sure to take proper precautions to secure your safety.

Support Services

Colleges are more than just dorms and classrooms. A good college experience includes a wide variety of services that cultivate students' personal development. You should consider what services a college offers to foster student advancement. Are there particular organizations or extracurricular activities that interest you? What programs are tailored to help students reach their full potential? Make sure you take full advantage of all the resources offered by the university.

Academics

Although college offers a lot more than just classes, a solid education is the ultimate reason you are spending large amounts of money to go to college. An important part of the college experience involves learning how to independently manage coursework along with the daily tasks of living and a fulfilling social life. Be careful not to neglect your studies with all the distractions on campus. Your grades and academic achievements will play an important role in your post-graduation opportunities, including job searches and opportunities for further education.

Majors

Some students start college knowing precisely what they want to study. Many others have no idea. Some students change their minds while at school. College provides a good opportunity to experiment with many different areas of study. If you are not sure what major to declare, take a sampling of courses to open your eyes to the opportunities. Many of these courses are required as a part of the university's core curriculum. Also take advantage of student counseling and advisors.

Location

The college's location is important, particularly when considering in-state and out-of-state tuition at public schools. You should also think about how far away from home you want to go. If you attend a university in your hometown, you may be able to save cost-of-living expenses by living with your parents or other relatives. Also consider whether you prefer a lively urban campus or the idyllic setting of a college in a small town or rural area. What sort of internship or career opportunities are available in the area where the college is located?

Post College

Be careful with your money

You might not be a teenager anymore, but you probably still feel somewhat invincible. Unfortunately, the passing years will take their toll. Now is the time to develop healthy habits to help you avoid serious medical problems when you reach middle age and beyond. Develop healthy eating habits. Get plenty of exercise by using a workout routine that you enjoy and can sustain. Drink alcohol only in moderation and don't smoke. Be a cautious driver. Keep stress under control. Get regular medical checkups. Your middle-aged and elderly self will thank you.

Build a routine

Welcome to the real world! You are out of school. You have a job. You have bills to pay. You have a household to manage. You may have children to care for (or at least a pet). It might all seem a little overwhelming at first, but you can manage it. Developing a routine can help you prioritize your tasks and get everything done. You will likely find that you still have plenty of time to enjoy life – and more money available to pay for the experiences and things you want despite the high tuition costs.

Take advantage of the resources around you

Even though you are now out on your own, you are not all alone. There are many resources available in your community to help you manage your life. Examples include financial planners, tax advisors, attorneys, career counselors, life coaches, religious or spiritual guides, and medical professionals, among many others. Don't be afraid to ask for help. You can also lean on your family and friends for advice and support.

Become a local

It's time to put down some roots now that you are in the working world. There are many ways to get involved in your local community. Consider joining civic organizations or volunteering with local charities. Perhaps you have a taste for local politics or you have found a cause you'd like to take up. Go for it! Taking part in the life of your community not only helps make it a better place to live, but you could also reap benefits as well. You could make social connections that could further your career and enhance your social life.

Make healthy choices

You might not be a teenager anymore, but you probably still feel somewhat invincible. Unfortunately, the passing years will take their toll. Now is the time to develop healthy habits to help you avoid serious medical problems when you reach middle age and beyond. Develop healthy eating habits. Get plenty of exercise by using a workout routine that you enjoy and can sustain. Drink alcohol only in moderation and don't smoke. Be a cautious driver. Keep stress under control. Get regular medical checkups. Your middle-aged and elderly self will thank you.

Take your job seriously

Let's face it. Your first job after graduation is probably not the career you dreamed about while in college. Not many people are lucky enough to parachute right into the perfect position. No matter how insignificant you may believe your job to be, keep in mind that it is just a rung on the career ladder. Show your supervisors that you take your work seriously. Show up on time and do what is expected of you. The impressions you make in your first job could go a long way toward helping you get the position you really want.

Realize you're not at college anymore

For many people, college years were very enjoyable and will provide a lifetime of fond memories. Although the workaday world can retain some moments of college-like fun, you should remember that you have now entered a new phase of your life. For many young adults, payments due on student loans serve as harsh reminder of their new responsibilities. While it is important to work hard to establish yourself in your career and in your community, you should also make time to cut loose a little and take part in activities you enjoy.

- schets de levensloop van een mbo-student van 16 tot
- welke momenten heb je zelf studiegegevens nodig
- waar bestaan die uit (denk aan diploma's, cert., portfolio)
- aan wie wil je die gegevens dan ter beschikking stellen
- wie bewaart die gegevens nu?
